SUMMARY

Informatics Engineering graduate from Dian Nuswantoro University (UDINUS) with hands-on experience in full-stack web development through internship and independent software projects. Experienced in building web applications using Laravel, React.js, Express.js, MySQL, and MongoDB, including REST API integration, role-based access control, transaction processing, and database-driven systems. Also developing skills in Python, data analytics, and machine learning for data-driven problem solving. Seeking an entry-level Software Engineer, Full-Stack Developer, Backend Developer, or Data-related role where I can contribute and continue developing my technical expertise..

EXPERIENCE

CAPSTONE PROJECT

Fullstack Web Developer - Self-employed

Semarang, ID

April 2026 – June 2026

- Designed and developed a comprehensive restaurant Point of Sales (POS) web application using Laravel 12, Bootstrap 5, Tailwind CSS, and MySQL to streamline dining operations.
- Built a real-time order processing workflow that handles cart transactions, table occupancy tracking, discount calculations, and incremental ticket generation for kitchen printing.
- Developed a secure transaction rollback system (Void system) with pessimistic database locks (lockForUpdate) to ensure data integrity, automatically revert stock levels, and record audit.
- Designed and optimized database schemas to manage product inventories, track outbound stock logs, and monitor dining table availability statuses.access.
- Created an interactive admin analytics dashboard visualizing sales performance (daily, weekly, monthly) and trend growth comparisons using Chart.js
- Implemented Role-Based Access Control (RBAC) to enforce security boundaries, restricting sensitive operations like voids and sales reports to Administrator accounts.

Dinas Komunikasi dan Informatika Semarang

Semarang, ID

Fullstack Web Developer - Internship

June 2025 – September 2025

- Developed a web-based Fire Department Information System using React.js, Express.js, and MongoDB during an internship at Diskominfo Kota Semarang.
- Built responsive frontend interfaces and integrated REST APIs to support seamless communication between the client and server.
- Implemented CRUD functionality, image upload features, and database management for news, contact, and public service request modules.
- Performed debugging, system testing, and feature enhancements to improve application reliability and performance.
- Collaborated with the development team using Git and participated in requirement analysis, implementation, and deployment activities.

EDUCATION

UNIVERSITAS DIAN NUSWANTORO

Semarang, ID

Bachelor of Informatics Engineering

June 2026

Cumulative GPA: 3.22/4.0; Relevant Coursework: Algorithms; Network Fundamentals; Security Essentials; Data Structures; Clean Code and Design Pattern; Object-Oriented Programming; Database; IT Fundamentals

TECHNICAL SKILLS

Programing Languages: JavaScript, PHP, Python, SQL, HTML, CSS

Web Development: Laravel, React.js, Express.js, React Native, Bootstrap, Tailwind CSS, REST API

Data & Machine Learning: Python for Data Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Machine Learning Fundamentals

Databases: MySQL, MongoDB

Tools & Technologies: Git, GitHub, Docker, Chart.js
