## SUMMARY

Informatics Engineering graduate from Dian Nuswantoro University (UDINUS) with hands-on project experience in software development. Adaptable, detail-oriented, and equipped with a solid foundation in computer science principles and modern tech stacks.

Actively seeking Entry-Level Software Engineer / Tech Roles where I can contribute, learn, and grow alongside an impactful engineering team.

## EXPERIENCE

**CAPSTONE PROJECT** Semarang, ID

Fullstack Web Developer - Self-employed April 2026 – June 2026

- Designed and developed a comprehensive restaurant Point of Sales (POS) web application using Laravel 12, Bootstrap 5, Tailwind CSS, and MySQL to streamline dining operations.
- Built a real-time order processing workflow that handles cart transactions, table occupancy tracking, discount calculations, and incremental ticket generation for kitchen printing.
- Developed a secure transaction rollback system (Void system) with pessimistic database locks (lockForUpdate) to ensure data integrity, automatically revert stock levels, and record audit.
- Designed and optimized database schemas to manage product inventories, track outbound stock logs, and monitor dining table availability statuses.access.
- Created an interactive admin analytics dashboard visualizing sales performance (daily, weekly, monthly) and trend growth comparisons using Chart.js
- Implemented Role-Based Access Control (RBAC) to enforce security boundaries, restricting sensitive operations like voids and sales reports to Administrator accounts.

**Dinas Komunikasi dan Informatika Semarang** **Semarang**, ID

Fullstack Web Developer - Internship June 2025 – September 2025

- Developed a web-based Fire Department Information System using React.js, Express.js, and MongoDB during an internship at Diskominfo Kota Semarang.
- Built responsive frontend interfaces and integrated REST APIs to support seamless communication between the client and server.
- Implemented CRUD functionality, image upload features, and database management for news, contact, and public service request modules.
- Performed debugging, system testing, and feature enhancements to improve application reliability and performance.
- Collaborated with the development team using Git and participated in requirement analysis, implementation, and deployment activities.

## EDUCATION

**UNIVERSITAS DIAN NUSWANTORO** Semarang, ID

Bachelor of Informatics Engineering June 2026

Cumulative GPA: 3.22/4.0; Relevant Coursework: Algorithms; Network Fundamentals; Security Essentials; Data Structures; Clean Code and Design Pattern; Object-Oriented Programming; Database; IT Fundamentals

## TECHNICAL SKILLS

**Languages**: Advanced in JavaScript, HTML, CSS, NodeJS; Proficient in Php
**Others:** Docker, Laravel, MongoDB, React ,React Native,SQL
